

15A/15B

Ultra-light 20 mm mounts

Building on the success of its range of 20 mm cannon with their associated ammunition, Nexter Systems has developed two ultra-light naval mounts known as 15A and 15B.

15A/15B

Ultra-light 20 mm mounts

These mounts combine outstanding effectiveness with ease of integration (recoil force below that of .50 mounts, lightweight, small turning radius). They represent ideal weapons for interception missions and self-defence, especially for small craft.

The very simple manning make them easier to operate and maintain.

The 15A or 15B models are selected by customers depending on their ammunition standard (20 x 102 mm or 20 x 139 mm).

■ SPECIFICATIONS

Mount	15A	15B
Armament	20 M 621	20 M 693
Feed system	Single	Dual
Ammunition standard	20 x 102 mm	20 x 139 mm
Average Rate of fire (rds/min.)	750	740
Ammunition stowage	160	2 x 150
Sight	Clear sight Night option (Image Intensification)	Clear sight Night option (Image Intensification)
Laying	Manual	Manual
Azimuth	±170°	±170°
Elevation	-10°/+40°	-10°/+45°
Turning radius (mm)	1,750	1,880
Weight (kg)	190	270
